INTRODUCTION LETTER

CRE-TEC was established at the turn of the century in Saudi Arabia and quickly gained the reputation of a specialized contractor in the fields of concrete strengthening and repair as well as waterproofing services.

Twenty years of continuous growth is the proof of the momentum that has been maintained at **CRE-TEC** since its incorporation in Riyadh, Saudi Arabia back in 2000.

Looking back at the previous years, we have seen **CRE-TEC** growing from a small specialized establishment with one branch in Riyadh to become one of the major specialized contracting companies in the kingdom with branches in Riyadh and Jeddah.

The most important factor of this achievement is the way we value our long relationship with our customers.

Furthermore, our team of highly talented engineers and staff composes the solid foundation of the company success.

Our wide range of service which includes waterproofing, thermal insulation, concrete repair, strengthening and protection, tank internal lining, shotcrete, industrial flooring, cracks injection, stamped concrete among others reduces our corporate risk factor and gives our company an edge over its direct competitors.

None of this would have been possible without the support of our trusting clients as well as the diligence and skill of our committed staff. We are most grateful to all and each of them.

The company has successfully completed countless projects with innovation and practical skill, Keeping clients satisfied is its top priority, therefore, each project is carefully planned, scheduled and financially managed to ensure its completion, on time and within budget.

CRE-TEC has consistently used the brightest and most skilled professionals in every project undertaken and prides itself in implementing a stringent safety policy.

With ongoing training and instruction in the proper use of tools and equipment, this first rate team is equipped to provide expert advice for specialized contract services.

MISSION AND VISION STATEMENT

OUR MISSION IS:

1. To perform for our customers/clients the highest level of quality construction services at reasonable and market competitive prices.
2. To ensure the longevity of our company through repeat and referral business accomplished through customer satisfaction in all areas including timeliness, attention to detail and service-minded attitudes.
3. To maintain the highest levels of professionalism, integrity, honesty and fairness in our relationships with our suppliers, sub-contractors, professional associates and customers.

MISSION AND VISION STATEMENT

OUR VISION IS:

1. For the CLIENT:

"Value Beyond Building"

2. For the WORKFORCE:

"Challenge and Reward for Performance"

3. For the COMMUNITY:

"Respect in Every Part of the Society, People and Environment"

QUALITY AND SAFETY MEASURES

QUALITY MEASURES:

CRE-TEC is committed to seeking continuous improvement in all areas related to the management system. Quality Management System is a set of plans & procedures established to ensure compliance with the quality assurance set for the project.

Quality means understanding our client's requirements and making every effort to surpass them, while at the same time complying with quality standards and policies.

Our goal is to satisfy our client and to comply not only with the contractual requirements but also to provide excellence in engineering practice.

The primary objectives are:

- The establishment of quality standard and criteria.
- To maintain our excellent record in contracting industry.
- To render the services that the client wants.
- Quality system for testing, monitoring & reporting.
- To complete all projects on time and within budget.
- To exploit our accumulated knowledge and experience

The Quality Assurance and Quality Control Plan will be prepared for every new project to satisfy our client requirements and the job specifications.

QUALITY AND SAFETY MEASURES

SAFETY MEASURES:

Safety for all **CRE-TEC** personnel is an essential and integral part of the company policy either on site, during mobilization, demobilization and during project execution. The Safety Policy and safe handling develops with project preparation and commences to the final project handover and demobilization from site.

MANAGEMENT R OLE:

1. To practice accident preventive programs.
2. To provide a safety officer for each site responsible for applying safety measures independently from the operation.
3. To work with the client and consultant to execute the project safety program.

SAFETY OFFICER'S ROLE:

1. To strictly apply the company safety measures and policy.
2. To meet safety officer requirements in the client side regulations.
3. To work with the client and consultant to execute the project safety program.

LABORS' ROLE:

1. To commit to safety gear, safety shoes, helmets, dust masks, gloves and uniforms indicating the company name.
2. To report any work hazards and cooperate with the supervisors and safety officer.
